## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 12-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is no clear antecedent basis for "the gripping means" as recited in claim 12.

Regarding claims 13 and 14, the term "preferably" renders the claim indefinite because it is unclear whether the limitation(s) following the term are part of the claimed invention. See MPEP § 2173.05(d).

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

Art Unit: 3652

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1, 5, 6, and 8-12, as understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Sanders (4,723,800).

Sanders discloses an apparatus comprising handle means (68,70), frame members (32,34,36), gripping means (46,48,50), and retaining means in the form of rivets (see col. 3, lines 51-53).

5. Claims 1-12 and 14-21, as understood, are rejected under 35 U.S.C. 102(e) as being anticipated by Catlett (6,840,556).

Catlett shows a lifting device comprising two pivotally connected frame members (12,14) whose inner surfaces are covered with elastomeric strips (40). Regarding claim 12, the strips (40) are retained through adhesive. In regard to claims 14-21, Catlett's first portions (20,22,30,32) of the frame members can be pivoted to a position in which they extend coplanar away from each other. In the closed position (Fig. 3), the gripping surfaces of the frame members are disposed parallel to the side walls of the tank.

### ***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of

Art Unit: 3652

the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

8. Claims 13 and 22, as understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Catlett in view of Purcell (5,601,324).

Purcell shows a rubber gripping means (42a) retained above a lower lip (46) as best shown in Figure 2a.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to attach the Catlett rubber gripping means (40) above a lower lip as taught by Purcell in order to more securely retain such gripping means to the frame surface.

### ***Specification***

9. The abstract of the disclosure is objected to because it contains legal phraseology such as "means" which should be avoided. Correction is required. See MPEP § 608.01(b).

### ***Priority***

10. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Conclusion***

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Stefanik et al. and Radford both show gripping inserts retained above a bottom lip of a jaw.
